Lidl

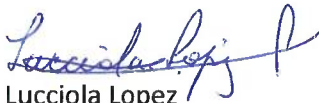

Germany-.

In relation to what is referred to in the IBEN Laboratory 2021/96198, 96197, 96345, 96196, 96342 reports corresponding to references E07237003P1, E07237004P1, E07237017P1, E07237019P1, E07237020P1:" Due to the noticeably high levels of 3-MCPD and glycyd esters, we would like to point out that the ALARA-Principle ("as low as reasonably achievable") applies. The production and the raw material should be checked and action taken accordingly taken to reduce the levels", we communicate that the results comply with parameter 3-MCPD, as defined in COMMISSION REGULATION (EU) 2020/1322 of 23 September 2020 Regulation (EC) No 1881/2006 by is amended as regards the maximum levels of 3-monochloropropanodiol (3-MCPD), 3-MCPD fatty acid esters and fatty acid glycydyl esters.

In addition, we have the declaration of our oil suppliers, where they confirm that they have established mitigation and control plans for verification of compliance with the levels established in Regulation 2020/1322 which results in low levels of 3-MCPDE and GE in finished products containing these oils.

We take advantage of the present to reiterate our desire for service, while at the same time being at your disposal to resolve any additional doubts that may be presented in this regard.

Bets regards,

Lucciola Lopez
Chief of Quality
